Starting in Fall 2011, *Guadalupe River Park Conservancy* will be offering new field trips based on the Salmon & Trout Education Program (S.T.E.P.). *Guadalupe River Park Conservancy's* S.T.E.P. Series consists of exciting one-day field trips that focus on the salmon and steelhead trout that make their way up the Guadalupe River every year and the healthy watershed that these important species depend on. This field trip series was made possible by a generous grant from the eBay Foundation.
